

WHERE OUR FLOATS ARE USED

OUR FLOTATION SYSTEMS SUPPORT OPERATIONS IN:

- » Mining and mineral transport
- » Sand and gravel pumping
- » Marine dredging and land reclamation
- » Municipal wastewater and water-intake systems
- » Ports, harbors, and marine construction
- » Oil and gas pipelines
- » Environmental and industrial projects
- » Emergency response and temporary bypass lines

PARTNER WITH

EZ CONNECT FLOATS

We provide a complete range of flotation solutions designed for secure buoyancy, durable field performance, and minimal downtime. Whether you need floatation for pipelines, hoses, cables, or umbilicals, we will help you select the right configuration for your operational needs.

PIPE, HOSE, CABLE AND UMBILICAL FLOTATION SOLUTIONS

Reliable, modular HDPE float systems engineered for demanding marine, dredging, mining, wastewater, and industrial operations.

SUPPORT AND SERVICES

- » Selection and sizing guidance
- » Installation support
- » Maintenance recommendations
- » Emergency replacement assistance
- » Refurbishment planning

For consultations, quotations, or technical support, contact us today.

EZ CONNECT
FLOATS

DESIGNED FOR SECURE BUOYANCY AND
LONG-TERM PERFORMANCE

ABOUT EZ CONNECT FLOATS

EZ Connect Floats designs and manufactures dependable HDPE flotation systems for pipes, hoses, cables, and umbilicals. Our floats are engineered for stability and modularity, providing reliable buoyancy that can be reused across various pipe diameters. They are built to endure harsh conditions, resisting corrosion, UV exposure, and the rigors of industrial or marine environments.

OUR VALUE

- » Built for tough marine and industrial environments.
- » Wide product coverage across pipe, hose, cable, and umbilical lines.
- » Modular sizes suitable for multiple diameters and applications.
- » Support from selection through installation and lifecycle use.

CORE PRODUCT CATEGORIES

PIPE FLOATS

For buoyancy support on rigid pipelines used in dredging, marine construction, mining, and intake/outfall systems.

HOSE FLOATS

For flexible slurry, discharge and suction hoses require stable flotation and fast installation.

UMBILICAL FLOATS

For multi-line umbilical assemblies providing consistent floatation for critical supply and signal lines.

CABLE FLOATS

For electrical, communication, and control cables requiring protection and buoyancy.
